

INTO THE STREETS TO DEMAND
THE FEDERAL GOVERNMENT RESTORE

LEGAL ABORTION NATIONWIDE NOW!

The overturning of Roe v. Wade by the Supreme Court on June 24, 2022 was illegitimate. It was a watershed moment in this country's history. Immediately, eight states enacted abortion bans. That number continues to grow.

Denying the right to abortion forces women to bear children against their will. This does grotesque physical, emotional, societal, and psychic violence to women by reducing them to baby-making machines! This hijacks their bodies, their safety, their lives, their sexual autonomy, their aspirations and accomplishments, and their life-long relations in the service of patriarchal domination.

Forced motherhood is female enslavement. When women are not free, no one is free.

This attack on abortion rights is part of a patriarchal Christian fascist program that takes aim at contraception as well as LGBTQ rights. All this hits poor women, and especially Black and other women of color, especially hard.

Yet all too many pro-choice leaders and Democratic Party politicians preach a "realism" of simply working within this new reality. They tell us to dig in for the "long haul" of the electoral process or to focus on protecting abortion in a few states, helping women induce their own abortions, or helping women travel across state lines. Whatever their intent, this allows the Christian fascist juggernaut to continue to advance and capitulates to a growing nightmare.

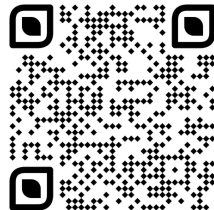

Whatever else we do, **what is most decisive is this: We must call forward the fury of millions of women and others who love justice to fill the streets and reverse this whole direction.**

The rights that have been won by the oppressed in this country have always required stepping outside of politics-as-usual and waging struggle. Let us learn from our sisters of the Green Wave across Latin America. They raised the Green Bandana and went into the streets in relentless resistance, again and again, growing in numbers and determination. Through struggle, they tore down the laws that criminalized abortion in Argentina, Colombia and Mexico!

Let us rise together, uniting all who can be united from diverse political perspectives, creeds, and backgrounds, in a Green Wave here that does not stop until we win:
LEGAL ABORTION ON DEMAND AND WITHOUT APOLOGY!
