

RISE UP 4 ABORTION RIGHTS!

HANDS OFF ABORTION MEDICATION!

Women need LEGAL ABORTION ON DEMAND & WITHOUT APOLOGY to be free!

On April 7, Trump-appointed federal judge Matthew Kascmaryk ordered the FDA to withdraw its approval of mifepristone, a medication that is safer than Tylenol and is used in more than 50% of abortions in this country. This order is scheduled to go into effect on April 14.

Kascmaryk's ruling was saturated with the language of a Handmaid's Tale theocracy, equating abortion to the killing of children and resurrecting the 1873 Comstock Act, an arcane "chastity" ban that could lay the basis for criminalizing abortion nationwide.

While it is possible that this decision will be stayed or delayed, no one should sit back and wait to see how the powers-that-be will respond.

Biden promises to fight this ruling in the courts – but the highest court, the Supreme Court, is packed with woman-hating theocrats who ripped away the constitutional right to abortion last year. Biden says: "[T]he only way to stop those who are committed to taking away women's rights and freedoms in every state is to elect a Congress who will pass a law restoring Roe versus Wade" – but the Democrats had 50 years to codify abortion rights and they never did! On top of that, the fascist Republicans attempted a coup on Jan 6, 2021. They illegitimately expelled Black state representatives in Tennessee. In response to Trump's recent arrest, Tucker Carlson said it's "not time to give up your AR-15s." Counting on these fascists to respect a meaningful election they lose is delusional.

We must rely on ourselves!

Now is the time to raise YOUR voice in opposition. Take to the streets. Disrupt business as usual. Mobilize the one force that can compel those in power to back off their assault on abortion rights – the masses of people standing up in our hundreds and soon thousands & then millions. **WE REFUSE TO SUBMIT TO FEMALE ENSLAVEMENT THROUGH FORCED MOTHERHOOD!**

LEGAL ABORTION ON DEMAND AND WITHOUT APOLOGY!

Rise Up 4 Abortion Rights!

On the evening of April 12, the 5th Circuit Federal Court of Appeals dramatically restricted women's access to mifepristone, a drug used in more than 50% of abortions in this country. This case is now before the Supreme Court. Among the illegitimate restrictions put on mifepristone:

** It can now only be prescribed by doctors, no longer by nurses and other healthcare workers.

** Women must show up in person, ending access through mail and telehealth visits.

** Mifepristone can only be prescribed up to 7 weeks into pregnancy, no longer up to 10 weeks. 7 weeks is long before many women even know they are pregnant.

Everyone who supports the fundamental right to abortion to prepare to protest any restriction of mifepristone on the day after an announcement of the Supreme Court's intentions.
